

ABSTRACT OF THE DISCLOSURE

A repairing structure of an integrated driving circuit for flat panel displays is disclosed. The repairing structure of the integrated driving circuit includes at least one driving circuit, a multiplexer unit and a display area. The multiplexer unit is connected to the at least one driving circuit through a plurality of video signal lines, and also, is connected to the display area through a plurality of data lines. The multiplexer unit further includes a dummy portion having a plurality of input-leads and a plurality of output-leads for repairing the connection between the multiplexer unit and the driving circuit or the display area.
